

生化所生物資訊核心設施收費表 (2024 版)

Service Charge of the Bioinformatics Core at the Institute of Biological Chemistry (2024 revision)

| 服務項目 (Service items) | 所內收費 (fee for IBC) | 院內收費 (fee for AS) | 備註 (Note) |
|---|---|----------------------|---|
| Bioinformatics Data Analysis: <ul style="list-style-type: none"> ● High-throughput data analysis ● Data mining ● Sequence analysis ● Advanced statistics ● Phylogenetic analysis ● Genomics analysis | 400 NTD/hour | 800 NTD/hour | Special rate is available. ¹ Service fee will be collected quarterly. ² |
| Application Development | Project-based | NA | The fee is project-based and is finalized upon user agreement. |
| Web Application Deployment: Intranet access within IBC only via inhouse web server | 3,000 NTD/app | NA | One-time deployment fee will be applied per application. |
| Internet access via AWS server | 20,000 NTD/year/app ³ | | For intensive data transfer on the internet via the web application, additional fee might be applied. |
| Data Storage for High-throughput Raw Data | 3,000 NTD/TB/year ³ | NA | For high-throughput data only, such as genomics, transcriptomics, and proteomics, etc. |
| Access to the High-performance Computing Server | 3,000 NTD/year ³ | NA | Up to 1TB hard-drive space on the server per account. ⁴ |

¹: Special discount will be provided as follows: 10 % discount for fees between 50,000~100,000 NTD/project and 20% discount for fees >100,000 NTD/project.

²: Invoice of service fee is issued quarterly: January, April, July, and October.

³: The invoice for the annual service fee will be issued in January. If the service period is less than one year, the service fee will be prorated accordingly.

⁴: Request for additional hard-drive space on the server requires approval by the biology facility user committee.
